## ☆ GY6 Moped Mini Bike | Converted to Mini Chopper | Unique | Runs! - \$100

(Charlotte, NC) 

image 1 of 6

I have a moped that I converted to a mini chopper. I've stripped the frame down and welded a stool to the frame as a seat. Very unique bike! I made this about 2 years ago and have been working on other things, it will start up and run great until you give it some gas, then it will want to cut off. Don't like messing with carbs so I am letting it go cheap. Has a gas tank, speedometer and fuel gauge. Electric start with automatic choke.

It has a GY6 moped motor and currently is straight piped so it's crazy and a definite head turner. I'm open to trades or straight \$100 cash. The motor is worth that price.

Call or text me at [show contact info](#) Thank you. Wont last long...
